

JORDAN EXAMPLE

PRODUCT ENGINEERING | WORKFLOW SYSTEMS, ACCESSIBILITY & RELIABLE DELIVERY

Remote | [example.com/jordan](#) | [github.com/example/jordan](#) | [example.com/contact](#)

PROFESSIONAL PROFILE

Software engineer with six years of fictional experience building reliable workflow products and internal platforms. Turns ambiguous operational problems into maintainable systems, with an emphasis on measurable delivery, accessible interfaces, and clear technical communication.

CORE CAPABILITIES

Engineering: TypeScript · Python · React · Node.js · REST APIs · PostgreSQL

Quality: Automated testing · Observability · Accessibility · Performance profiling

Delivery: Product discovery · Technical writing · Mentoring · Iterative planning

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Example Labs

2023 - Present

Remote | Workflow platform and support operations

- Led delivery of a fictional case-management workflow used by 140 support specialists, reducing median handoff time by 31% in a controlled internal comparison.
- Introduced contract tests and deployment health checks across eight services, cutting release-related incidents from an illustrative 10 per quarter to four.
- Partnered with design and operations to make the highest-volume flows keyboard accessible and documented the reusable implementation patterns.

Software Engineer | Northstar Systems

2020 - 2023

Hybrid | Reporting and internal tooling

- Built a TypeScript and PostgreSQL reporting service that replaced three manual spreadsheet processes and saved an estimated 18 fictional staff hours per week.
- Reduced p95 response time for a high-traffic dashboard from 1.8 seconds to 620 milliseconds through query analysis, caching, and payload redesign.
- Mentored two early-career engineers through scoped projects, code reviews, and written delivery plans.

SELECTED PRODUCT WORK

Civic Queue Simulator

2024

Interactive, privacy-safe simulator for exploring staffing and arrival-rate tradeoffs in public-service queues.

- Published a tested calculation engine, accessible controls, and a methodology note using entirely synthetic data.

Release Notes Assistant

2023

Small local tool that groups merged changes into a reviewable release-note draft.

- Designed the workflow to keep a human approval step and avoid sending repository data to external services.

EDUCATION & CREDENTIALS

B.S. in Computer Science | Example State University

2016 - 2020

Example City | Fictional institution

Certifications: Cloud Systems - Example Learning (2022); Web Accessibility - Sample Institute (2023)

Languages: English (fluent); Spanish (conversational)
